

Empower Biometrics with Profession

JN Data Resolution

Introduction of JN Data

JN Data was established with a commitment to deliver premier solution of biometrics department, empowering our clients to focus in biometric research and submission. We are dedicated to introducing talents with excellent in-hand experience of biometric positions. We believe our staffing service could benefit our clients in cost saving, improving productivity and maximizing returns in R&D investment through our constant technology innovation, consistent, highest standard and exceptional customer-aligned service.

Jackie Zhang, co-founder, President

Terry Li, co-founder, Vice President in Biostatistics

Thomas Ma, co-founder, Vice President in Business Development

Staffing Service

The basic logic of our staffing service is linking experienced candidates with the job requirement from our clients. JN Data developed multiple methodologies to serve the clients.

Extensible talents network

We started this business by leveraging our network of colleagues, using it as a foundation to gradually expand into a broader talent network. This approach ensures the reliability and effectiveness of our ability to provide high-quality talent.

In-hand Experience Focus

Besides considering the title of our candidates, we pay more attention to the in-hand experience since the clients hire contractors who are “doers”.

Flexibility

JN Data accepts flexible and in-need contract from 3 to 12 months in order to help clients achieve budget control. With the national wide talents network, clients could have scalability by ramping up or down based on the project needs.

Staffing Service

Our Clients

JN Data is proud to work with creative top-level pharmaceuticals and CROs national wide.

● Our Employees

JN Data attracts talents all over the United States, fulfill the on-site, hybrid and fully remote requirements.

**One of the most frequent question asked by our client:
How do you find fake resumes and understand your capability of your candidates?**

We have a clear policy of rejecting fraudulent resumes and have developed a comprehensive set of methods to detect them. Our extensive employee network enables us to cross-verify the professional and educational backgrounds of candidates. Additionally, we conduct thorough interviews with every candidate, focusing on their specific hands-on experience and practical skills. This approach not only helps us identify discrepancies but also ensures an accurate assessment of their capabilities.

Teams

The company has 3 teams: recruiting team finds and maintains relationship with our candidates. Operation team is responsible for client's relationship and assign interview. Account team is responsible for payroll processing and accounting. We share this to convince that we are trying to build up cross-cycle “win-win” relationship between both clients and our employees.

JN Data focuses in biometrics contractor positions for years. We could introduce Statistical Programmer, Clinical Data Manager, and Biostatistician to pharmaceutical and CRO clients from fresh graduates to 10 years experience. The candidates locates national wide in United States, capable for on-site and fully remote jobs.

Our programming and analytical team possesses an average of six years of experience within specific industries, enriched by hands-on involvement in multiple projects.

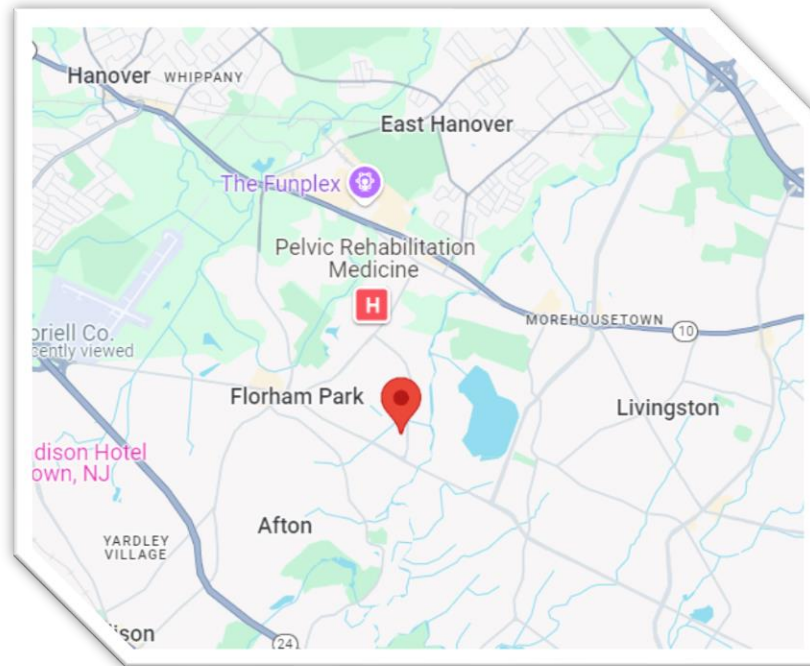

Contact

Our headquarter is located in Florham Park, New Jersey, where we have established a professional and welcoming environment. We highly value building strong relationships and therefore encourage in-person discussions with both our existing clients and potential clients to better understand their needs, explore opportunities, and collaborate effectively on tailored solutions.
